Cool Technology

Augmented Reality Visor Dramatically Improves Surgery

VOSTARS medical visor is a head-mounted display system capable of superimposing patient's X-ray images in 3D unison with their anatomy.

Employing new photonics technology, European scientists are developing a new augmented reality surgical visor in a bid to improve accuracy of interventions, showing anesthetic and medical data while superimposing a patient's X-ray in perfect unison with their body, meaning surgeons never having to look away during an operation and surgery times reduced by more than 20 minutes for every 3 hours. Check out more about this cool new technology.
